DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 22, 25-30, 32-39 and 50-64, drawn to an intelligent drug dispensing system, classified in class 700, subclass 231.
 - II. Claims 65-66, drawn to an intelligent drug dispensing system comprising an ink-jet mechanism that delivers a mist for patient inhalation, classified in class 123, subclass 203.12.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as a tablet dispensing system. Invention II concerns a dispensing system that dispenses a mist from an ink-jet printing mechanism for inhalation by a patient. The claimed dispensing device of Invention I functions differently when dispensing a tablet versus a dispensing device that dispenses a mist, as described in the claims of Invention II. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jeffrey A. Shapiro whose telephone number is (571)272-6943. The examiner can normally be reached on Monday-Friday, 9:00 AM-5:00 PM.
